

4. Employee Net Promoter Score (eNPS)

The eNPS is an internal tool used to track your engagement and satisfaction at the company you work at. To get started hit 'Start!' on the eNPS tool on the landing page.

On the first page of the eNPS score you get few dashboards that show an overview of the scores submitted, including trends and charts.

You can submit a score by pressing the 'Start' in the top right. You will also get a direct link emailed to you on occasion.

In the top right you can click the funnel next to the start button. This will open a filters menu.

Filters allow you to narrow down the data you are looking at.

Fore eNPS this is related to date ranges which can be chosen from a dropdown menu, such as 'Last 6 Months' or 'Previous Month'.
